

3D Face Mask

FAST DRY
WASHABLE
ANTI-BACTERIAL
UV PROTECTION
DEODORIZATION

The breathable, lightweight 3D face mask.

Made with Aerosilver™ antibacterial fiber from Hyosung TNC.

Reusable, Antibacterial Face Mask

Silver has been known to have antibacterial properties for centuries and can be found in many household cleaning products.

The silver (Ag) is introduced to the fiber in polymerization of the yarn.

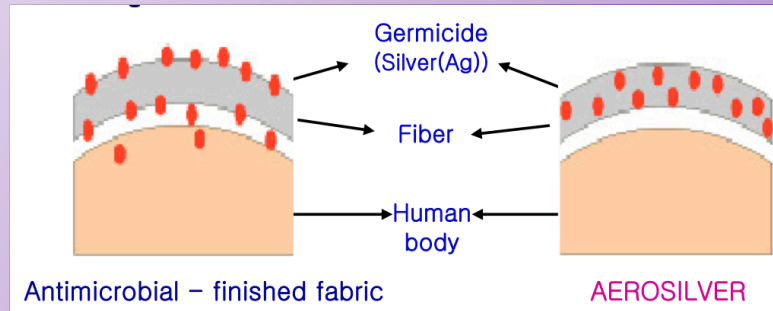

This means that the fabric retains its silver content and its antibacterial property even after multiple washes.

The benefits of Aerosilver™ face masks over some other reusable face covering are –

- Washable and fast drying.
- Moisture wicking activity keeping face drier and fresher for better comfort.
- 3D structure to give extra protection.
- Multiple washes while retaining its antibacterial properties.
- Stretch properties to give good fit.
- No migration of silver to skin.

Can be printed with own design or logo. MOQ's apply.

ANTI-MICROBIAL RATIO (KS K 0693-2001)
